Working Practices

It is your responsibility to protect yourself from injury when lifting, carrying, pulling or pushing anything. In order to do this the following guidelines should be observed:

- Do not attempt to lift anything that you know to be beyond your capability.
- Ask for help with large, heavy or awkward items.
- Where possible, lighten the load, separate items so that they are more manageable.
- When lifting heavy objects bend your knees and keep your back straight, ask for assistance if necessary.
- Similarly when reaching to remove/replace something on a high shelf or to position something on the wall above head height, it is your responsibility to protect yourself from injury, as well as to safeguard others by acting responsibly. In order to do this the following guidelines should be followed:
 - Ensure that you are sufficiently elevated to see what you are doing, do not attempt to pull something from a shelf above head height without first checking that it is safe to do so.
 - Use an appropriate ladder or step to enable you to reach, do not stand on chairs, not only could a resultant fall cause you injury but could also lead to the injury of others nearby.
 - Ask for help if necessary.
 - Do not work at height, on steps or ladders until they are properly secured and another person is present.

Wear suitable protective clothing/eye protection when undertaking tasks that may involve contact with toxic substances or dust/debris etc.

Hygiene

In the interests of health good hygiene practices are essential. The following guidelines should be observed:

- Plastic gloves should be readily available and should be worn at all times that there might be contact with body fluids e.g. when cleaning toilet areas or for dealing with spilt blood from whatever cause.
- All surfaces at which food is to be prepared or eaten must first be thoroughly cleaned with an appropriate cleaner.
- Hands must be thoroughly washed before food preparation.

- the cause of the accident i.e. what happened
- a brief description of the injury (if any) sustained
- the first aid (or other) treatment administered and by whom
- whether or not medical aid had to be sought
- the name of the person who dealt with the incident.
